

Lesson 4: HTML Links & Images

Course: Web Development Basics

Grade Level: Beginners (Age 10+ or adult learners)

Duration: 45–60 minutes

Lesson Number: Day 4

Topic: HTML Links & Images

1. Learning Objectives

By the end of this lesson, students will be able to:

- Insert images using the `<img>` tag
- Use key image attributes: `src`, `alt`, `width`, `height`
- Create hyperlinks using the `<a>` tag
- Link to websites, email, and open links in new tabs
- Build a simple webpage using images and links

2. Materials Required

- Computer / Laptop
- Online HTML Editors / IDEs:
 - Replit (<https://replit.com>)
 - CodePen (<https://codepen.io>)
 - JSFiddle (<https://jsfiddle.net>)

- W3Schools Tryit Editor (<https://www.w3schools.com/html/tryit.asp>)
- Slides (optional)
- Teacher's notes & sample code

3. Lesson Overview (Teacher Notes)

This lesson introduces two important ways to add interactivity and visuals to a webpage:

- ✓ **Images** using the tag
- ✓ **Links** using the <a> tag

Students will practice placing images and linking to useful resources, then build a mini webpage.

4. Lesson Breakdown

➤ 4.1 Warm-Up (5 minutes)

Share the screen with images and links (Google home page, Wikipedia)

Ask students

- ✓ What do you notice?
- ✓ How to add the images?
- ✓ Importance of Images in the website?
- ✓ What will happen if I click on this link?

➤ 4.2 Teaching Images (10 minutes)

Let the learner's type and run the code

```
<h2>My Favorite Animal</h2>
```

```

```

Explain in simple terms:

- ✓ `<img>` is a **self-closing tag** (no closing tag)
- ✓ **src** = where the image is located/image address
- ✓ Teach the learners how to use the image mention either you can download or use the image address.
- ✓ **alt** = text shown when image fails / screen readers
- ✓ **width** and **height** adjust size

Ask students to:

- ✓ Change image
- ✓ Change size
- ✓ Remove alt and use an incorrect address, then see what happens.

➤ 4.3 Teaching Links (10 minutes)

Let the learner type and run the code

1) `<h2>Useful Link</h2>`

`<a href="https://www.google.com">Google</a>`

Explain:

- ✓ `<a>` = anchor (link) tag
- ✓ href = URL
- ✓ If the learner is not sure about the URL, show them how to access it.
- ✓ Clickable text appears between opening and closing tags
- ✓ Link will be opened in the same tab itself.

2) Open in a new tab

`<a href="https://www.wikipedia.org" target="_blank">Visit Wikipedia</a>`

- ✓ Link will be opened in a new tab because of the target value.

3) Email link

`<a href="mailto:example@gmail.com">Send Email</a>`

Ask students:

- Change link text.
- Link to their favorite site.

➤ 4.4 Combined Example (5 minutes)

Let the learner to type and run the code

`<h1>My Favorite Cartoon</h1>`

`<img`

`src="https://tse4.mm.bing.net/th/id/OIP.K4ulQ4vEOsSUNzsMROiatAHaE7?pid=Api&P=0&h=220`

`" alt="cartoon" width="250">`

`<br><br>`

`<a href="https://www.disney.com/" target="_blank">Learn More</a>`

Ask them to change the link, image, and heading

5. Hands-on Activity

Create a webpage titled “My Travel Gallery”

Must include:

- One heading
- 2 images
- 2 links
- One link must open in a new tab
- Meaningful alt text

6. Assessment (Exit Ticket)

- Which tag is used to show images on a webpage?
- What does the **alt** attribute do?
- Write an example of a link tag.

- How do you open a link in a new tab?
- True or False: `<img>` needs a closing tag.

7. Homework

Build a “Favorite Movies” Page, include

- One heading, subheading.
- One paragraph about the movie.
- One image of the movie.
- One link to watch the trailer.
