

MICROLEARNING MODULE SAMPLE- HTML

HEADING AND PARAGRAPH

Duration: 5-10 minutes

Audience: Beginners (Age 10+ or adult learners)

1. Learning Objective

By the end of this module, learners will be able to:

- Identify and use HTML heading tags <h1> to <h6>
- Create paragraphs using the <p> tag
- Build a simple webpage with properly structured text

2. Introduction

HTML gives structure to a webpage. Headings and paragraphs are the **building blocks of text content**.

Headings (<h1>—<h6>):

- <h1> = main heading, largest
- <h2> to <h6> = subheadings, decreasing size

Paragraphs (<p>):

- Wrap normal text inside <p> tags
- Each paragraph starts on a **new line** with spacing

3. Code Example

Headings

```
<h1>My Favorite Hobby</h1>
```

<h2>Introduction</h2>

<h3>Why I Love It</h3>

Paragraphs

<p>My favorite hobby is reading books. It helps me relax and learn new things.
</p>

<p>I spend at least 1 hour every day reading different genres. </p>

4. Hands-on Activity

Create a simple webpage about **your favorite food**:

- One <h1> main heading
- One <h2> subheading
- At least **two paragraphs <p>** describing your food

Optional: Use , <i>, or <u> to format some words.

5. Quick self-check

- Which tag is used for paragraphs?
- What is the difference between <h1> and <h3>?
- How do headings help structure a webpage?

6. Summary/Key Takeaways

- Headings organize content into sections
- <p> creates readable blocks of text
- Proper structure makes a webpage clear and easy to read
