

ATHIRA A

International Coding Instructor | EdTech Content Developer | Transitioning into Instructional Design and Curriculum Development

Phone: 9497327319 | Email: athiraajith91@gmail.com | LinkedIn: linkedin.com/in/athira-a-4aba615a | GitHub: github.com/Athiraajith91

PROFILE SUMMARY

International Coding Instructor with 5 plus years of experience delivering Python, Scratch, Web Development, and App Lab to learners aged 6 to 16 across 10 plus countries. Strong background in lesson planning, student assessment, project-based learning, and structured curriculum delivery. Hands-on content development experience at Aptcoder creating Python modules, quizzes, concept notes, and structured learning materials. Currently transitioning into Curriculum Development and Instructional Design through self-directed learning — independently built a portfolio of instructional design artifacts including ADDIE-based curriculum units, Rise 360 e-learning courses, SCORM modules, microlearning content, storyboards, and AI-powered educational resources. Passionate about designing learner-centered, outcome-driven educational content aligned to real-world skill needs.

CORE COMPETENCIES

Coding Instruction: Python, Scratch, HTML, CSS, JavaScript, ReactJS, App Lab, Code.org — Grades 3 to 16
Lesson Planning: Structured lesson design, learning objectives, activity sequencing, student differentiation
Content Development: Practice sheets, quizzes, concept notes, guided projects, student assessments
Instructional Design Tools (Self-taught): Storyline 360, Rise 360, SCORM — demonstrated in portfolio projects
Instructional Design Frameworks: ADDIE model, Bloom's Taxonomy — applied in self-directed portfolio projects
AI in Education: Prompt engineering, generative AI content repackaging, instruction tuning, dataset creation
Learning Management Systems: Moodle, Google Classroom, LMS administration
Technical Skills: Python, JavaScript, HTML, CSS, Bootstrap, ReactJS, GitHub, Google Workspace, MS Office, Canva

PROFESSIONAL EXPERIENCE

International Coding Instructor | Cuemath

Dec 2024 – Jan 2026 | Part-Time

Delivered coding instruction to international learners using Code.org, Scratch, and App Lab

- Planned and delivered structured coding sessions to international learners aged 6 to 16 across multiple time zones
- Designed lesson activities and guided projects tailored to individual student ability and learning pace
- Maintained 95 percent positive student feedback through consistent quality delivery and responsive teaching
- Tracked student progress across sessions and provided detailed performance feedback to parents and guardians

Content Developer | Aptcoder

Feb 2024 – Oct 2024 | Part-Time

Educational content creation for an EdTech platform — closest role to instructional design

- Developed structured Python learning content including practice sheets, quizzes, concept notes, and guided exercises for an EdTech platform
- Created AI-assisted educational content as part of a structured content development workflow
- Collaborated with the content team to align learning materials with program objectives and course structure
- Gained hands-on experience in educational content creation, iterative content refinement, and quality review

International Coding Instructor | Turito*Feb 2024 – Jun 2025 | Part-Time*

- Delivered structured Scratch and Code.org sessions to international learners through hands-on project-based activities
- Designed guided practice exercises to reinforce core computational thinking and coding concepts

International Web Development Instructor | Codeyoung*Jul 2022 – Feb 2024 | Part-Time*

- Taught HTML, CSS, JavaScript, Bootstrap, and ReactJS to international learners through structured outcome-driven lesson plans
- Designed and delivered project-based learning activities resulting in a 30 percent improvement in student project completion
- Planned progressive lesson sequences building from basic HTML structure to JavaScript interactivity

Senior International Coding Instructor | Codingal*Feb 2022 – Dec 2022 | Part-Time*

- Delivered Scratch and Code.org lessons to global learners maintaining consistent lesson quality and student engagement
- Created structured lesson guides and student assessment checkpoints to track and document learning progress

Subject Matter Expert - Computer Science | Chegg*Freelance*

- Provided expert-level answers to programming questions with high accuracy and clearly structured explanations

SELF-DIRECTED PORTFOLIO PROJECTS

The following projects were independently developed to build Instructional Design and Curriculum Development skills. All artifacts are available at github.com/Athiraajith91

- Python Curriculum Unit — Full ADDIE-based curriculum unit with learning objectives, lesson flow, assessments, and rubrics for Grades 6 to 10
- Rise 360 Course — Responsible AI in Education — 20-minute SCORM-ready e-learning module for educators covering AI ethics and responsible classroom use
- SCORM Module — Loops in Coding for Beginners — Storyline 360 interactive module with branching scenarios and knowledge checks
- Generative AI Repackaging Project — Transformed traditional lesson content into microlearning modules, scenarios, and quizzes using AI-assisted workflows
- Microlearning Modules — AI and Web Development series with clear single-outcome learning goals per module
- Storyboards — AI Concepts and Basic Coding Loops — professional instructional design storyboards with screen layouts, narration scripts, and interaction specifications
- Web Development Lesson Plans — 5 structured lesson plans for HTML, CSS, and JavaScript with activities, assessments, and teacher notes
- Teacher Slide Decks — Python Day 1 and Prompt Engineering for Educators with full facilitation guides
- Instruction Tuning Dataset Practice — Sample instruction-response pairs formatted in JSON for AI and ML learning applications

CERTIFICATIONS

- Google AI Essentials — Google
- Prompt Engineering for ChatGPT — DeepLearning.AI, Coursera (2025)
- Google Certified Educator Level 1 — Google (In Progress)

EDUCATION

B.Tech - Computer Science and Engineering | Mangalam College of Engineering 2009 – 2013

KEY SKILLS AND TOOLS

Instructional Design, Curriculum Development, Curriculum Design, Learning Objectives, Lesson Planning, Content Development, Educational Content Creation, E-Learning Development, ADDIE Model, Bloom's Taxonomy, Storyboarding, Microlearning, Project-Based Learning, Student Assessment, Learning Management System, LMS Administration, Articulate Storyline 360, Articulate Rise 360, SCORM, Moodle, Google Classroom, Prompt Engineering, Generative AI, AI in Education, Instruction Tuning, Python, Scratch, JavaScript, HTML, CSS, ReactJS, Code.org, App Lab, GitHub, Google Workspace, Canva, Online Teaching, International Students, EdTech

Career Transition Note: I am actively transitioning from 5 plus years of international coding instruction into Curriculum Development and Instructional Design. My self-directed GitHub portfolio demonstrates real capability in ID tools and frameworks. I bring what most ID candidates lack — deep practical understanding of how learners actually learn, built through thousands of live teaching hours with international students across 10 plus countries.
