

RESPONSIBLE AI – STORY BOARD

Slide/Screen	Learning Objective	Content/Script	Visuals/Media	Interaction/Activity
1. Title slide	Introduce the topic	“Responsible AI: Building safe and Ethical AI system	Title, AI-themed background	None
2. What is AI?	Recall basic definition of AI	AI means making computers think and act like humans.	Icons: robot, brain	Ask: Where do you see AI around?
3. What is Responsible AI	Define Responsible AI	Responsible AI means developing and using AI safely, fairly, and ethically.	Icons: AI brain, shield.	Short reflection: Why do we need responsibility in AI?
4. Why responsible AI matters?	Explain importance	Prevent harm, ensure fairness, protect privacy, increase trust	Image: lock, scale, eye, user data	Ask: Which risk worries you more?
5. Fairness	Understand Fairness	AI should not discriminate against any group	Example: Hiring AI-biased results	Mini- Case: Consequences of biased AI
6. Transparency	Understand Transparency	We should know how AI makes decisions	Include an AI decision flowchart	Identify where transparency is needed
7. Accountability	Explain accountability	Humans must take responsibility for AI outcomes	Icons: person with speech bubble, AI system	Ask: Who is responsible when AI makes a mistake?
8. Privacy	Understand privacy	AI must protect user data.	Icon: Finger print	Example: apps collecting data without consent
9. Safety & Reliability	Understand safety	AI should work as intended and avoid harmful actions	Warning icons, safety test visuals	Safe vs unsafe AI behavior activity
10. Case Study	Apply knowledge	Facial recognition bias / self-driving error	Case study images	Group discussion

11. Summary	Review principles	Fairness, Transparency, Accountability, Privacy, Safety	5 principle icons	Quick recap quiz
12. Assessment	Check understanding	3–5 MCQs	Quiz layout	Answer activity
13. Conclusion	Call to action	Let's build AI that is safe, fair, and beneficial for all.	Inspirational graphic	Final reflection
