

Storyboard:

Loops in Coding - For Beginners

Learning Objectives:

Learners should understand

- What is a loop?
- How to implement in coding?
- How is it helpful in coding?

Additional Notes:

- Voice

Scene 1 | Basics

Slide 1.1 | Course Title

Audio Narration	Screen Text and Graphics
	On-Screen Text: Loops in Coding Images: Plain background with a laptop
Technical Notes:	

Slide 1.2 | Introduction

Audio Narration	Screen Text and Graphics
Welcome to this course on Loops in Coding. In this course, you'll learn: • What is a loop, • How to implement in coding? • How is it helpful in coding?	On-Screen Text: Introduction In this course, you'll learn: • What is a loop, • How to implement loops in coding? • How is it helpful in coding?

	Images: A kid thinking, Scratch screen
Technical Notes:	
On-Screen Text and Images will animate in accordance with the Audio narration.	

Slide 1.3 | What is a loop

Audio Narration	Screen Text and Graphics
	On-Screen Text: A loop means doing something again and again until a goal is reached. Example with icons: • Brushing teeth → up & down • Jumping 10 times • Watering each plant
Technical Notes:	

Slide 1.4 | Everyday loop examples

Audio Narration	Screen Text and Graphics
	On-Screen Text: We will discuss some examples from your daily life • Repeat 3 times – Ring the bell 3 times • Repeat until done – Eat until full • Forever loop – A fan spinning
Technical Notes:	
When the example is clicked, the text and image should appear.	

Slide 1.5 | Blocks for different Loops

Audio Narration	Screen Text and Graphics
	On-Screen Text: These are the blocks that will help us to apply different types of loops in coding. • Repeat 5 times • Repeat until (reach goal) • Forever loop Images: • Show the real blocks in Scratch • Character walking • Character walks until it touches the red color. • Star
Technical Notes:	

Slide 1.6 | How it is helpful in coding

Audio Narration	Screen Text and Graphics
What do you think about loop? how it's helpful in coding	On-Screen Text: Without a loop Vs with a loop Images: • Display code without a loop • Display code with a loop Explain: A loop will help you to reduce the number of lines in your code
Technical Notes:	

Slide 1.7 | Drag and Drop Activity

Audio Narration	Screen Text and Graphics
	On-Screen Text: Drag items: • Repeat 10 times • Repeat until correct • Forever loop Drop areas: • Jump rope 10 times • Doing math until the answer is correct • Clock ticking
Technical Notes:	

Slide 1.8 | Summary

Audio Narration	Screen Text and Graphics
	On-Screen Text: Intro Layer: This is an interactive 360° image. Click and drag to look around the background and find and click on the markers to get the summary of this lesson Base Layer: • [Markers:] • What is a loop? A loop will help you to do things again and again • Different types of loops Repeat 3 times, Repeat until, forever loop • Usage of loops help you to reduce the number of lines in your code Images: • Intro Layer: loop icon • Base Layer: 360° Scratch blocks and characters. Button: • START
Technical Notes:	
The Intro Layer appears first, providing instructions for interacting with the 360° image. Clicking the START button transitions to the Base Layer. In the Base Layer, learners can click and drag the 360° image to explore the scene. Markers are placed within the 360° image to highlight key elements. Hovering over a marker displays its title. Clicking on a marker reveals additional information in a label.	

Scene 2 | Quiz

Slide 2.1 | Question 1

Audio Narration	Screen Text and Graphics
	Q1. What is a loop? A. Doing something once B. Repeating an action many times - Correct C. Always saying no Slide Layers: Correct: Correct That's right! You selected the correct response. Button: Continue Incorrect: Incorrect You did not select the correct response. Button: Try Again Incorrect You did not select the correct response. Button: Continue
Technical Notes: Single Choice Question Slide. Once "Submit" is clicked, the appropriate feedback layer (Correct or Incorrect) is displayed based on the selection. Both feedback layers include a "Continue" button, which advances the learner to the next slide.	

Slide 2.2 | Question 2

Audio Narration	Screen Text and Graphics
	Q2. Which one is a loop? A. Eat once B. Jump 10 times - Correct C. Sleep for 1 hour Slide Layers: Correct: Correct That's right! You selected the correct response. Button: Continue Incorrect: Incorrect You did not select the correct response. Button: Try Again Incorrect You did not select the correct response. Button: Continue
Technical Notes:	
Single Choice Question Slide. Once "Submit" is clicked, the appropriate feedback layer (Correct or Incorrect) is displayed based on the selection. Both feedback layers include a "Continue" button, which advances the learner to the next slide.	

Slide 2.3 | Question 3

Audio Narration	Screen Text and Graphics
	Q3. What is a “Repeat Until” loop? A. Repeat forever B. Repeat until a condition becomes TRUE -Correct C. Repeat 2 times only Slide Layers: Correct: Correct That’s right! You selected the correct response. Button: Continue Incorrect: Incorrect You did not select the correct response. Button: Try Again Incorrect You did not select the correct response. Button: Continue
Technical Notes:	
Single Choice Question Slide. Once "Submit" is clicked, the appropriate feedback layer (Correct or Incorrect) is displayed based on the selection. Both feedback layers include a "Continue" button, which advances the learner to the next slide.	

Slide 2.4 | Question 4

Audio Narration	Screen Text and Graphics
	Q4. A fan spinning is an example of: A. Repeat 10 times B. Repeat until done C. Forever loop - correct Slide Layers: Correct: Correct That's right! You selected the correct response. Button: Continue Incorrect: Incorrect You did not select the correct response. Button: Try Again Incorrect You did not select the correct response. Button: Continue
Technical Notes:	
Single Choice Question Slide. Once "Submit" is clicked, the appropriate feedback layer (Correct or Incorrect) is displayed based on the selection. Both feedback layers include a "Continue" button, which advances the learner to the next slide.	

Slide 2.5 | Question 5

Audio Narration	Screen Text and Graphics
	Q5. Which loop fits this? “Throw the ball until you hit the target.” A. Repeat 5 B. Repeat until - Correct C. Forever Slide Layers: Correct: Correct That’s right! You selected the correct response. Button: Continue Incorrect: Incorrect You did not select the correct response. Button: Try Again Incorrect You did not select the correct response. Button: Continue
Technical Notes:	
Single Choice Question Slide. Once "Submit" is clicked, the appropriate feedback layer (Correct or Incorrect) is displayed based on the selection. Both feedback layers include a "Continue" button, which advances the learner to the next slide.
